## Why Computer Information Systems?

Nothing stays the same in the world of business, markets and technology … so to keep a competitive edge, companies and organizations need skilled workers like you who know how to manage information systems in three areas: accounting, programming and web development. Local, national and international companies—including banks, insurance companies, state agencies, and major programming firms— have hired SFCC graduates!

CIS Programming includes a Skills Certificate and an AAS degree. It's possible to earn the 18-credit-hour certificate in two semesters. With the certificate you'll be prepared for entry-level programming jobs or you can continue on to earn the AAS degree that provides more hands-experiences in various programming languages and an internship that applies knowledge and skills in a work environment.

Our CIS Web Development program will teach you to design, create and manage powerful websites. With the explosion of e-commerce, many companies now generate a substantial percentage of their revenue from online purchases, and even the smallest companies have a web presence. Companies need talented professionals who can produce effective, interactive websites that are easy to navigate, visually appealing and contain the latest in web design technology. If you want a career in cyber industry, this degree is ideal for you.

Our CIS Accounting program will give you skills to set up and maintain those systems. Career opportunities increase daily as the demand grows for professionals who can apply both accounting and computer skills.

## Certificate and Degree Options

> Associate of Applied Science degree in Computer Information Systems with Emphasis in Accounting
>> 65 credit hours
> Skills Certificate in Computer User Support
>> 19 credit hours
> Skills Certificate in Programming
>> 18 credit hours
> Professional Certificate in Web Design Applications (pending)
>> 30 credit hours
> Associate of Applied Science in Computer Information Systems with Emphasis in Programming
>> 68 credit hours
> Associate of Applied Science in Computer Information Systems with Emphasis in Web Development
>> 68 credit hours

## Is this Program Right for Me?

Some common skills and abilities needed for this program:

> Excellent computer skills
> Patience, persistence, extreme accuracy
> Ability to think logically and analytically
> Skills in creativity and project management
> Critical thinking and problem solving skills
> Communication and interpersonal skills

## Transfer and Bachelor's Degree Options

SFCC has agreements with many four-year schools that ensure our credits transfer. We have augmented agreements with Central Methodist University (CMU) that provide bachelor's degree programs at SFCC's Sedalia, Clinton, Lake of the Ozarks, and online campuses; University of Central Missouri (UCM) and University of Missouri-Columbia for specific on-ground programs; and Drury University, Grantham University and University of Phoenix for specific online programs. CMU and UCM also offer dual admission through SFCC.

## Apply—It's as easy as 1, 2, 3!

1. Apply online at **www.sfccmo.edu**. It's Free!
2. Submit placement scores and official transcripts.
3. Enroll in classes!
