SFCC Students,

State Fair Community College is committed to your safety and continues to monitor the Centers for Disease Control (CDC) for updates on the COVID-19 virus, commonly referred to as the Coronavirus. To date, there are no known outbreaks anywhere in the SFCC service region. However, this can change at any time, especially with spring break and increased travels (domestic and internationally) occurring next week. To better prepare for an outbreak, SFCC has announced the following:

1. **All on-site and online classes will be suspended March 23-27.** No classes will be conducted. Student residents will be permitted to remain in the residence halls, without interruption of food services. SFCC Instructors will use March 23-27 to modify or adjust their curriculum for alternative delivery, in the event an outbreak occurs.
2. The **SFCC Career and Technology Center will remain open** to secondary education students.
3. **Dual credit courses in high schools** will continue to meet.
4. **Dual credit students enrolled in college courses at any SFCC location** (including online) will not meet.
5. **All courses will resume March 30,** as normally scheduled, **UNLESS** otherwise notified.
6. Students are encouraged to take all course materials and technology home with them when they leave for spring break, **just in case** classes have to be taught alternatively (online) for the remainder of the semester.
7. **All students are expected to return,** when classes resume on **March 30,** **UNLESS** otherwise notified by the college.
8. **IF** the college elects to shift all classes to online or alternate delivery for a portion or the remainder of the spring 2020 semester, students must have access to the internet and required technology.
9. **All deadlines currently posted in Canvas courses will change after March 23.** Students should check the assignments for updated deadlines or contact instructors for details.
10. **Access to 2nd eight-week classes will be available March 27.**
11. Students enrolled in health science clinical courses **may still be expected** to participate in clinical work March 23-27.
12. **All college-related travel is halted** for conferences, trainings and other academics, unless approved by the college president.
13. **All college-related events scheduled for this semester** are subject to cancelation or postponement.
14. **All updates will be posted at** [www.sfccmo.edu/COVID-19](http://www.sfccmo.edu/COVID-19).

Please have a safe and happy spring break. Please check with your instructor if you have any questions and consult the [CDC travel advisories](https://www.cdc.gov/travel/) if you have any travel plans.

Thank you,
Dr. Joanna Anderson  
SFCC President

and the  
COVID-19 Planning Committee  
State Fair Community College
