

Ensuring that the systems within a facility and the occupants work harmoniously together requires multiple disciplines to ensure functionality, comfort, safety, and efficiency.

To excel as a facility management professional in today's workforce, employees must stand out by increasing their credibility and value. The facility management professional takes on a leadership role within a company or organization and must incorporate foundational concepts of leadership & strategy, business concepts, project management, and communication.

This training will cover these core elements of facility management:

- Introduction to Facility Management
• Introduction to Operations and Maintenance
• Basics of Building Systems
• Application of FM related Technology
• Implications of Health and Safety in Managing Buildings
• Supervisory Roles
• Work Management Tools
• Managing Contractors
• Managing and Tracking Customer Relations

Upon successful completion, students shall:

- o Demonstrate the ability to work effectively as a member of a team
o Demonstrate a working knowledge of the functional areas of facilities management.
o Compete in a peer and Facility Management expert judged competition solving a real-life Facility Management challenge.

Participants will receive an International Facility Management Association and SFCC | The LearningForce certificate of completion

Hybrid Course:
Combination of Training Center/Living Lab & Virtual

Cost:
\$1995 per person
