

# OSHA 10 General Industry On Demand

## Hybrid Program

SFCC's unique hybrid model of learning utilizes the best of both on-ground and online training with minimal disruption to production and is flexible enough to accommodate any schedule.

Orientation - The "student" meets with an instructor for an overview of the program, account creation and online access (30-45 minutes) to ensure they are comfortable logging in and moving forward on their own. This also serves as an introduction to a "live" instructor so they can feel more comfortable and confident reaching out if there are questions or technical issues during the course.

Each participant is required to complete 600 minutes of online training (10 hours x 60 minutes) however can use as many hours as needed and have 180 days in which to complete the course. The instructor is available as needed throughout the course should participants have questions or any technical issues. After successful completion of all sections, participants are certified and receive their OSHA 10 card.
