Why Chemistry?

SFCC's Associate of Science (AS) degree in Chemistry is designed for pre-medical majors or students who want to earn a bachelor's degree in chemistry at a four-year institution. This program provides you with the first two years of study toward a Bachelor of Science degree at the University of Central Missouri in Warrensburg. Chemistry programs at other colleges differ slightly, so we strongly suggest you work closely with both SFCC and the receiving institution to map out your degree plan.

Chemistry majors work in most all industries as chemists; chemical engineers; environmental consultants; analysts for water, nutrition, materials, and pharmacology; and biochemists (forensics, paternity, genetics, and medical procedures), to name a few specific areas.

Certificate and Degree Options

- › Associate of Science in Chemistry
 - » 62 credit hours

Is this Program Right for Me?

To be successful in the chemistry field you should have strong analytical, critical-thinking, observation, and technical skills; excellent time-management and writing skills; and strong interpersonal and speaking skills.

Transfer and Bachelor's Degree Options

SFCC has agreements with many four-year schools that ensure our credits transfer. We have augmented agreements with Central Methodist University (CMU) that provide bachelor's degree programs at SFCC's Sedalia, Clinton, Lake of the Ozarks, and online campuses; University of Central Missouri (UCM) and University of Missouri-Columbia for specific on-ground programs; and Drury University, Grantham University and University of Phoenix for specific online programs. CMU and UCM also offer dual admission through SFCC.

Apply—It's as easy as 1, 2, 3!

1. Apply online at www.sfccmo.edu.
2. Submit placement scores and official transcripts.
3. Enroll in classes!

Student Success Navigator

Once admitted, your assigned Student Success Navigator works with you, one-on-one, to schedule classes and navigate you to success. To learn more, visit www.sfccmo.edu/navigator.
