

Sexual Assault Awareness

Information & Resources

WHAT IS CAMPUS SEXUAL VIOLENCE?

Preventing sexual violence on campus takes more than one department, office, club, team, administrator, professor, staff member, or student. It takes all of us working together in big and small ways. Everyone can play a role in creating safety, equality, and respect on campus.

What is sexual violence?

Sexual violence occurs when someone is forced or coerced into unwanted sexual activity without agreeing or consenting. Reasons someone might not be able to consent include:

- Fear
- Being underage
- Having an illness or a disability
- Incapacitation due to alcohol or other drugs

Consent initially can be given and later be withdrawn. Sexual violence is a crime that comes in many forms, including forced intercourse; sexual contact or touching; sexual harassment; sexual exploitation; and exposure or voyeurism. Sexual violence is never the victim's fault. It does not matter what the victim was wearing or doing, whether the victim has been drinking, or what type of relationship the victim has with the person who is sexually abusing them.

Sexual Violence on Campus

- One in five women will be a victim of completed or attempted sexual assault while in college. (Krebs, Lindquist, Berzofsky, Shook-Sa & Peterson 2016)
- One in 16 men will be a victim of sexual assault during college (Krebs, Lindquist, Warner, Fisher, & Martin 2007)
- Among college women, nine out of 10 victims of rape and sexual assault knew the person who assaulted them (Fisher, Cullen, & Turner, 2000)
- More than 90% of sexual assault victims on college campuses do not report the assault (Fisher et al. 2000)
- 40% of colleges and universities reported not investigating a single sexual assault in the previous five years (U.S. Senate Subcommittee, 2014)

What is Affirmative Consent?

Consent is understood as an affirmative agreement to engage in various sexual or nonsexual activities. Consent is an enthusiastic, clearly communicated and ongoing “yes”. One cannot rely on past sexual interactions and should never assume consent. The absence of a “no” is not a “yes”. When sex is consensual, it means everyone involved has agreed to what they are doing and has

given their permission. Nonconsensual sex is rape. A person who is substantially impaired cannot give consent.

Sexual Assault Forensic Exams

It is your choice whether to have a forensic exam after an assault. To preserve evidence, visit a medical center to receive a forensic exam. Physical evidence may be collected as well as photographs may be taken of injuries. If you report, there may be biological evidence on the clothing you are wearing and the facility may want to keep the clothing as evidence. If this is the case, bring clean clothing to change into after the exam. It is recommended that before the exam try not to shower, drink, eat, change clothes, use the bathroom, brush your teeth or change the crime scene in any way.
