Stay up to date with the latest electrical code requirements in this comprehensive 8-hour 2023 NEC Code Change Training. This course is designed for electricians, contractors, and industry professionals who need to understand and apply the latest National Electrical Code (NEC) updates to ensure compliance and safety in their work.

Course Objectives:

- Review key updates and major revisions in the 2023 NEC.
- Understand new requirements for grounding, bonding, and wiring methods.
- Ensure compliance with updated overcurrent protection and safety standards.
- Improve NEC codebook navigation skills for quick reference.
- Apply code changes to real-world residential, commercial, and industrial scenarios.
